Who's Behind the Conti Ransomware Gang? - Part Two - 2024-01-03 16:35

In a series of blog posts I exposed the "The Top Management of the Conti Ransomware Group's Fashion and Charity Brands" including "Who's Behind the Conti Ransomware Gang" where I also offered an in-depth peek inside "The Conti Ransomware Gang and the Trickbot Cybercrime Enterprise XMPP's and Jabber Account IDs" where I also successfully applied for the Rewards for Justice program "Applying for the Rewards for Justice on the Conti Ransomware Gang Program" where I also published never-published or discussed before "New Images Courtesy of the Conti Ransomware Gang" including my Rewards for Justice Conti Ransomware Gang research compilation "Dancho Danchev's Rewards for Justice Conti Ransomware Gang Research and Analysis Compilation" which you can grab from here including my first Twitter Space on how I tracked down the Conti Ransomware Gang "My First Twitter Space on How I Tracked Down The Conti Ransomware Gang Using Real-Time OSINT" including to expose "Exposing Bentley and Liam From The Conti/Trickbot Malware Gang" including to publish never-published or discussed before Conti Ransomware Gang videos and images courtesy of the "The Conti Ransomware Gang" including to publish an additional set of never-published or released videos courtesy of the Conti Ransomware Gang "The Conti Ransomware Gang - Videos - Part Two" including to elaborate on some of my research in my "Rewards for Justice - Dancho Danchev" including to publish an additional set of "The Conti Ransomware Gang's OSINT Artifacts" including to also provide "A Compilation of Conti Ransomware

In this post I'll do a last round of elaboration into all the research efforts I've been putting into identifying core members of the Conti Ransomware Gang using their recently leaked internal communication publicly including to use exclusively OSINT for the purpose of successfully identifying key and core members of what appears to be a diversified cybercrime gang that has a pretty interesting way of distributing their fraudulently obtained income in the context of sponsoring and participating in fashion shows and other educational and music sponsorship efforts and campaigns on the Russian market supposedly using the stolen income that they've obtained using their ransomware tactics and techniques.

What I came up was the following a private teaching school a rap and hip-hop music label where we got some of the core Conti Ransomware Gang members doing their advertising creative and brochures next to doing their hardcore "upcoming" ransomware brand releases including several fashion and clothing brands where we once again have core members of the Conti Ransomware Gang doing their advertising and brochure creative.

The primary goal behind this post and analysis would be to elaborate as to the diverse nature of the members of the Conti Ransomware Gang in the context of having them involved in fashion music and teaching schools business and charitable initiatives in Russia supposedly using the stolen income which they obtained using their ransomware operation online.

It's also worth pointing out that this entire analysis including the OSINT analysis and the OSINT research and enrichment analysis is entirely based on the Conti Ransomware Gang's internal leaked communication and is done exclusively by me with some quite positive and confirmed results already.

Sample Conti Ransomware Gang image obtained using public sources based on the gang's internal leaked communication for a cover of a Russian Rap and Hip-Hop Artist and his album "Personality" apparently produced by the Conti Ransomware Gang's team members responsible for the advertising creative development for the gang

Based on my research and analysis the photo obtained using public sources based on the gang's internal leaked communication for a cover of a Russian Rap and Hip-Hop Artist and his album "Personality" belongs to the Russian rap and hip-hop artist known as Linkvill where we have members of the Conti Ransomware Gang producing their logos and advertising creative part of their portfolio.

Personally identifiable information for Evgeny Samsonov also known as Linkvill:

hxxp://vk.com/eugene_linkvill
hxxp://vk.com/artist/linkvill
hxxp://vk.com/linkvill_poetry
hxxp://www.youtube.com/channel/UC9fVu7UVgxBaCRz7RJD7DeQ
Sample personal photos of Evgeny Samsonov also known as Linkvill:
Линквилл
Музыкант

Contacts 1

Evgeny Samsonov
голос/стихи

Женя Линквилл

It also appears that Evgeny Samsonov also known as Linkvill whose album cover "Personality" was obtained using public sources and appears to be produced by members of the Conti Ransomware Gang who are responsible for creating the gang's advertising creative is also part of the Plastika Sound Boutique Ekaterinburg where we also have a second image courtesy of members of the Conti Ransomware Gang mentioning the Plastika music label.

Sample personally identifiable information for Plastika Sound Boutique Ekaterinburg:

hxxp://vk.com/plastika.space
hxxp://plastika.space
Address: улица Кирова, 9, Екатеринбург

Part of Plastika Sound Boutique Ekaterinburg are:

- Nikita Zharinov - born on 10th of January 2002
- Ice Costa - hxxp://vk.com/icecosta
- Alexey Plyushkin - born on 11th of April 1994

PLASTIKA
SOUND
BOUTIQUE
EKATERINBURG
It gets even more interesting when we research a second image courtesy of the Conti Ransomware Gang which was once again obtained from their recently leaked internal communication.

Sample Conti Ransomware Gang image obtained using public sources based on the gang's internal leaked communication for a cover of a Russian Rap and Hip-Hop Artist Ice Costa apparently produced by the Conti Ransomware Gang's team members responsible for the advertising creative development for the gang

The image appears to be a second album cover once again produced by team members of the Conti Ransomware Gang responsible for advertising logos and advertising creative development this time by Ice Costa who is also a Russian rap and hip-hop artist who is also part of the Plastika Sound Boutique Ekaterinburg.
Sample photos of Ice Costa
(hxxp://www.youtube.com/channel/UCJQmq6UIEYlDnrNSOzZC6dQ):

The original Ice Costa album cover which is greatly similar to the one produced by members of the Conti Ransomware Gang obtained using OSINT

🎙 REC PLASTIKA
✨COVER Алексей Кибанов

...Не видел добра или зла, я не знаю ответ
Я допиваю дым молоком на обед

It appears that based on my OSINT analysis Alexey Plyushkin is the author of the original cover for Ice Costa's album which can be also found in Conti Ransomware Gang's internal leaked communication which means that he supposedly knows the actual team member of the Conti Ransomware gang that produced the advertising creative who also produced Evgeny Samsonov's (Linkvill) album cover.
Next we got three related images once again courtesy of the Conti Ransomware Gang's internal leaked communication this time for "Global School" teaching enterprise and for the Youla Land dance lessons school in Russia.

Sample photos include:

Where Is Anton Nikolaevich Korotchenko (Антон Николаевич Коротченко) Also Known as Koobface Botnet Master KrotReal? - Part Three - 2024-01-07 10:05

An image is worth a thousand words. And so is a [link](#) and my analysis on the Koobface botnet [here](#).

The Deepest Gipsy King of Them All? - Yavor Kolev - A Dipshit Courtesy of Republic of Bulgaria on the "International" - "I Have Never Left the Country" Law Enforcement "Scene" - 2024-01-10 04:35

Can you recognize apologies spot a dipship when you see one? Can the recognize the degradation between his teeth or what would some other dipshits courtesy of him that don't exist would consider something that doesn't exist to begin with the very presence of a human being his teeth and relevant face sculpture to begin with?
This is not poetry. This is the deepest ugliest and most disgusting presence that I would stay a million mile away to skip his relevance of existence to begin with.
There's a saying. The ones who are distusting are disgusting at all. Beware and don't even bother the elaboration on this. Watch out for the irrelevance of these people and try to avoid them to the bottom of your brains out and there's not such word as out. The dipshitness of your overall irrelevance is bothering other to be bottom of their irrelevance. The result? You don't exist. At all.
If you can spit it try to vomit it but vomit the bottom of your brain's and idiocity's irrelevance to the bottom of your brain's out. We will find and beat the bottom of your irrelevance out to the bottom of your irrelevance out. You're a disgusting presentation of people who dipshit on each other and then skip the breakfast. And guess what? The dinner.
Stay tuned. But you don't.

Dancho Danchev (Данчо Данчев) (born November 22 1983) in Sofia is a cybersecurity researcher journalist and a blogger based in Bulgaria. He lives in Troyan.

Early Life   [edit]

Dancho Danchev has been an active security blogger since 2007. He is a cybersecurity researcher and a WhoisXML API threat researcher.[1][2][3] He runs one of the security industry's most popular security publications with over 5.6M page views Dancho Danchev's Blog - Mind Streams of Information Security Knowledge.[4] He is known for reporting first on the Chinese hacktivist" attack on CNN.com in 2008, the Operation Ababil attack on Wells Fargo U.S. Bank and PNC Bank and the New York Times advertisement attack in 2009.[5]

He has been associated with ZDNet's Zero Day blog, where he co-wrote articles and analyses on East European criminal activity and online scams. Danchev's research often focused on cyber terrorism activities of terrorist groups and monitoring the activities of the Koobface worm which targeted users of social networking sites, including Facebook.

Danchev went missing in 2011, according to reports, after his blog post on the collection of his research on terrorist organisations' use of the internet for jihad.[6][7]

Education   [edit]

Dancho have studied in Vasil Levski Secondary School in Troyan Bulgaria and later on studied at Hogeschool Zuyd in Sittard The Netherlands and then at Hogeschool InHolland in Rotterdam The Netherlands. He holds a TOEFL certificate.

Events   [edit]

- Dancho is known to have presented at the Netherlands Intelligence Studies Association (NISA).[8]
- Dancho is known to have presented the Keynote presentation at CyberCamp 2016 event in Spain.[9]
- Dancho is known to have presented at Cybersecurity Talks Bulgaria.[10]

Work Career   [edit]

Dancho is known to have been moderating DiamondCS's Trojan Defense Suite newsletter in 1999.[11] Dancho is known to have been running Astalavista Security Group's Astalavista.com[12] in 2003 Web site and Astalavista.box.sk Web site in 2021.

Interviews   [edit]

- Dancho gave an interview to Deutsche Welle on the Koobface botnet[13]
- Dancho gave an interview to LinuxSecurity.com[14]
- Dancho participated in a WhoisXML API Podcast[15]
- Dancho gave an interview to Russian OSINT[16]

Disappearance   [edit]

In September 2010, Danchev went missing under mysterious circumstances amid concerns about his safety. Prior to his disappearance, he had expressed concerns about surveillance by Bulgarian law enforcement and intelligence services. Despite efforts to contact him through various means, including phone and email, he could not be reached. ZDNet published a letter and photos he had sent, seeking information on his whereabouts. While anonymous sources indicated he was alive but facing difficulties, the exact details of his disappearance remain unknown.

Major Achievements   [edit]

- Dancho is known to have participated in a Top Secret GCHQ Program to monitor hackers online based on a document part of Edward Snowden's archive.[17]
- Dancho is known to have discovered that PaloAlto Networks is part of the SolarWinds supply chain malicious software attack[18]
- Dancho is known to have discovered that the Web site of Flashpoint has been compromised and was redirecting to malware[19]
- Dancho is also known to have contributed to research involving the Avalanche and the Mumba botnets[20]
- Dancho is known to have heavily contributed to various scareware related research[21]
- Dancho is known to have contributed to the use of search engines by cybercriminals in the context of blackhat SEO (search engine optimization) and malicious search engine results poisoning research[22]
- Dancho is known to have contributed research on the Luthuanian cyber attacks and the Russia vs Georgia cyber attacks[23]
- Dancho is known to have been running and maintaining the "Diverse Portfolio of Fake Security Software" blog posts on scareware blog posts series[24]
- Dancho Danchev has been quoted on India's CAPTCHA solving economy[25]
- Dancho is known to lead the threat intelligence market segment according to a comparative market study[26]

Awards   [edit]

- Dancho won a Jessy H. Neal Award for Best Blog for ZDNet's Zero Day Blog in 2010.[27]
- Dancho also won a SCMagazine Social Media Award for "Five to Follow on Twitter" in 2011.[28]

Book Citations   [edit]

- Dancho has been cited in Cyber Security Essentials[29]
- Dancho has been cited in Security Awareness: Applying Practical Security in Your World[30]
- Dancho has been cited in CompTIA Security+ Guide to Network Security Fundamentals[31]
- Dancho has been cited in Security+ Guide to Network Security Fundamentals[32]

Career [edit]

Danchev is known for discovering computer virus and spamming attacks as they surface on the Internet, and providing details on the new threats.[1] As a security researcher, he has been the first person to report major malware campaigns as they begin to take form.[2] Danchev has also discussed the use of new technology, like USB keys, and their potential effects on the internal security of the computer systems of major corporations.[3] Danchev reports on the use of new technology or methods of breaking through Internet security protocols as well.[4]

His blog posts and articles have included explanations of the overall landscape of the underground malware industry in countries like Russia and China,[5][6] in addition to the use of the Internet by terrorist networks.[7][8] The entities he has reported on include volunteer militias of hackers that independently attack the servers of enemy nations while their countries are in the midst of military operations, such as Russia's involvement in Georgia.[9] In 2009 he discovered that the Indian embassy in Spain had been taken over to serve malware to those who visited the site.[10] He also reports on the hacking of major corporate websites.[11][12][13]

Specific attacks that Danchev provided initial analysis for include a "Chinese hacktivist" attack on CNN.com in 2008;[14][15] the Operation Ababil attack on Wells Fargo, U.S. Bank and PNC Bank;[16] a 2009 malicious comment attack on YouTube and Digg.com;[17] a large 2010 blackhat SEO campaign affecting both Bing and Google searches;[18] a 2009 New York Times malvertisement attack;[19] and a 2010 attack on Network Solutions.[20]

Koobface investigations [edit]

In February 2010 Danchev posted an article called "10 things you didn't know about the Koobface gang", discussing various interactions he has had with them (they once redirected the Facebook website to his blog) and other pieces of information. In May the creators of the malware then forced its network to post a point by point response to the article on the screens of all the computers they had infected.[21] Danchev continued his investigations into the gang, eventually posting the full biographical details of some of its members on his blog.[22]

2010 Disappearance [edit]

In late 2010 *ZDNet*, which Danchev co-wrote, reported that he had disappeared from home in Bulgaria and was feared harmed.[23] On September 11, 2010 he submitted what would be his final post of the year, writing about a "cyber jihad" and during that month he also sent letters to friends stating that he was concerned that he was under surveillance.[24] After his disappearance ZDNet received a message stating that "Dancho's alive but he's

Dancho, HBGary is interested in talking w/ you about Threat Intelligence

Dancho,

My company, HBGary, is developing a new business unit which we call "Global Services". A keystone of the offering is tracking human and organizational factors behind malware threats. Your work, and some of the work of your peers, seems to be very good analysis in this area. Since the space is new to us, I want to tap the best minds in the industry to help us develop an offering. Would you be interesting in spending some time with our team to discuss your work and methodology? On the market side I am also trying to pin down what customers will actually pay for, and perhaps you have some insight here as well. I am willing to hire you as a consultant, and/or pay for your time and travel in any way that works for you. I will be at RSA next week, and our company has an event for customers in San Jose in the first or second week of May. I also travel to Washington DC quite alot.

Dancho Danchev's Dark Web Onion 1.5TB OSINT/Cybercrime Research and Threat Intelligence Gathering Personal Memorabilia Files 2010-2023 Private Torrent Dark Web Auction

https://ddanchev.blogspot.com

Email: dancho.danchev@hush.com

Wire Bank Transfer Details for This Dark Web Auction Available On Request Using Email

Auction Bids For My Private Personal Files 2010-2023 Memorabilia Torrent [1.5TB] [ZIP] Start At $85,000

Full Directory Listing in HTML Available As A Teaser Using Email
Dear Dark Web Onion visitor,

This is Dancho Danchev (https://ddanchev.blogspot.com) and I'm proud to welcome you to my Dark Web Onion Auction Web site.

2024 - 02

A Case Study on a Bulgarian Dipshit Local Drug Addict Gang Member and A Peasant From Troyan, Bulgaria Part of The Gang that Robbed and Kidnapped and Home Molested Me - 2024-02-11 10:48

When you're so dumb that even the "drugs" can't "catch you". The next thing that follows is the laughing.

Petar Shoshkov - Exposing a Bulgarian Troyan City Based Bottom Sucking Gang Member That Robbed Home Molested and Kidnapped Me - 2024-02-11 10:48

Is it the "lack" of or the lack of?

The Ugliest Bulgarian Wannabe Law Enforcement Officer Real Life "Cop" In the Bulgarian "System" - 2024-02-11 10:48

Can you suck my bottom? Do you have the permission of other people to do it before you suck mine? Do you know what does this constitutes? Let's play a game. If my bottom is in the ugliest and most disgusting part of the universe and you want to suck it does this mean that you're there too? You don't exist.

We in the face of your parents should rather pay you to best yourself and stop existing and make a free low profile non-existent and cheap movie out of it which is something that you shouldn't forget doesn't constitute anything. It's the very art of having you beat yourself courtesy of your parent's money and having the very same non-existent Bulgarian dipshits pay you to beat yourself. While beating yourself you can easily forget about compilations and series of movies about your beating simply because your very ugliness and disgusting existence doesn't compare to that of a human being.
